Game Developer

Summary

Mohamed Zied Sellami is a passionate and resourceful game developer with strong skills in game design, programming, and interactive storytelling. Proficient in Unreal Engine and Unity, Zied has experience developing gameplay mechanics, user interfaces, and immersive environments. With a solid understanding of Blueprints and C#, he brings creative ideas to life through functional prototypes and polished gameplay. His strengths include system design, problem-solving, and collaborating on projects from concept to completion.

KEY COMPETENCIES
